Summary

Driving seamless EDI integration, I am a Senior SAP Integration engineer at Henkel with over 5 years of experience in the consumer goods, retail, and manufacturing sectors. I specialize in delivering robust B2B EDI solutions (X12/ANSI, EDIFACT) using SAP IDocs, ALE, and integration middleware to ensure timely data exchange and reduce manual processes. Known for my problem-solving skills, I've implemented automation and process enhancements that increased ticket-resolution efficiency by 20%, earning multiple client appreciations and the Sieger (Delivery Champion) award. In my current role, I lead EDI monitoring and mapping for trading partners. I swiftly identify and resolve integration errors in orders, deliveries, and shipments. I proactively develop fixes for recurring issues (e.g. EDI map logic updates and partner connectivity setups) to minimize business impact. My collaborative approach includes coordinating with stakeholders (LSPs, customers, IT, and master data teams) to ensure data accuracy and compliance. Passionate about continuous improvement, I stay current on EDI technologies and advocate best practices. Let's connect if you're looking for an experienced SAP SD/EDI Analyst to streamline integrations and support your business objectives.
